		2.2	<b>Iteration</b>	<p>For these purposes, an iteration is defined the repetition of the match process. The initial cycle is the 1st iteration. A repetition of the cycle becomes the 2nd iteration.</p> <p>Some matches have only one iteration, while others have multiple iterations that are labelled with numbers (pre-fixed) .</p>				
		2.3	<b>Match year</b>	The calendar year in which residency training is scheduled to begin.				
		2.4	<b>Application</b>	Information provided in order to be considered by a program. Sometimes referred to as an "Application package".	2.4.1	<b>Average no. of program applications</b>	The number of applications submitted divided by the number of applicants who applied to at least one program.	Average
				Application differs from registration, as successful completion of the registration process confers the ability to participate in a CaRMS match, whereas the application process shows interest in a particular program.	2.4.2	<b>No. of applications submitted</b>	The applications submitted to programs.	Count (sum)

3.0	<b>Applicant composition</b>	3.1	<b>Registrant</b>	A medical trainee who is registered in the CaRMS Online system.	3.1.1	<b>No. of registrants</b>	Medical trainee who is registered in the CaRMS Online system.	Count (sum)
		3.2	<b>Active applicant</b>	A medical trainee who is registered in the CaRMS Online system, is eligible to participate in a residency match and has submitted at least one application to a program.	3.2.1	<b>No. of active applicants</b>	Medical trainees who are registered in the CaRMS Online system to participate in a residency match and have submitted at least one application to a program.	Count (sum)
					3.2.2	<b>No. of applicants where ROL not submitted</b>	Applicants who submitted an application to a program and have not submitted a rank order list.	Count(sum)
		3.3	<b>Inactive applicant</b>	A medical trainee who is registered in the CaRMS Online system, is eligible to participate in a residency match and has either: 1) withdrawn all their applications or 2) has not applied to any program.	3.3.1	<b>No. of inactive applicants</b>	Measurement of the number of applicants who have requested a withdrawal of all their applications or not applied to a program.	Count (sum)
		3.4	<b>Match participant</b>	A medical trainee who is registered in the CaRMS Online system to participate in a residency match and has submitted at least one application to a program and ranked at least one program.	3.4.1	<b>No. of final match participants</b>	Measurement of the number medical trainees who are registered in the CaRMS Online system to participate in a residency match and have submitted at least one application to a program and ranked at least one program.	Count (sum)

4.0	Trainee Type	4.1	<b>Canadian Medical Graduate (CMG)</b>	Applicant type identified as a Canadian trainee receiving their MD from one of the LCME/CACMS accredited medical schools in Canada. (17 in 2019)	4.1.1	<b>No. of distinct CMG applicants</b>	Unique CMG applicants based on their unique applicant identifier. Often used when calculating across match iterations.	Count (sum)
		4.2	<b>United States Medical Graduate (USMG)</b>	Applicant type identified as a United States medical graduate receiving their MD from a LCME/CACMS accredited medical school within the United States (154 in 2019), or applicants receiving their Doctor of Osteopathy (DO) from an AACOM accredited osteopathic medical school in the United States (35 in 2019).	4.2.1	<b>No. of distinct USMG applicants</b>	Unique USMG applicants based on their unique applicant identifier. Often used when calculating across match iterations.	Count (sum)
					4.2.2	<b>Allopathic USMG applicants</b>	Applicants with an MD from the 154 LCME/CACMS accredited medical school in the United States.	
					4.2.3	<b>Osteopathic USMG applicants</b>	Applicants with a DO from the 35 AACOM accredited osteopathic medical schools in the United States.	
		4.3	<b>International Medical Graduate (IMG)</b>	Applicant type identified as an International medical graduate receiving their MD from an international medical school listed with the World Directory of Medical Schools published	4.3.1	<b>New IMG registrant</b>	An international medical trainee that is participating for the first time in a residency match.

				by the Foundation for the Advancement of International Medical Education and Research (FAIMER) and the World Federation for Medical Education (WFME).	4.3.2	<b>Returning IMG registrant</b>	International medical trainee that is participating for the second or subsequent time in a residency match.	
					4.3.3	<b>No. of distinct IMG applicants</b>	Unique IMG applicants based on their unique applicant identifier. Often used when calculating across match iterations.	Count (sum)
5.0	<b>Applicant Characteristics</b>	5.1	<b>Year of graduation</b>	Year in which applicant is anticipated to receive or has received their medical degree. For CMGs, date is provided by the graduating school. IMGs and USMGs self identify their year of graduation.				
		5.2	<b>Current year medical graduate</b>	Descriptor identifying a that the applicant is anticipated to graduate with their MD within the current match year cycle. Based on the year of graduation on the class list provided by the medical school (for Canadian medical graduates). Year of graduation for USMGs and IMGs is self-identified.	5.2.1	<b>No. of current year medical graduates</b>	Measure identifying the number of applicants expected to graduate with their MD within the current match year cycle. Based on the year of graduation on the class list provided by the medical school (for Canadian medical graduates). Year of graduation for USMGs and IMGs is self-identified.	Count (sum)

					5.3.3	<b>Previous years medical graduate multiple attempts at matching</b>	Descriptor identifying that the applicant graduated with their MD outside the current match year cycle. Based on the year of graduation on the class list provided by the medical school (for Canadian medical graduates). Year of graduation for USMGs and IMGs is self-identified.  Individual has attempted to match one or more times.	
		5.4	<b>Regions within Canada</b>	Geographic rollup of medical schools within Canada. Regions are defined as West, Quebec, Ontario, and East.				West: UBC, Calgary, U of A, Sask, Man  Ontario: McMaster, Toronto, Western, Ottawa, Queen's, NOSM  Quebec: Laval, McGill, Montreal, Sherbrooke  East: Dal, MUN
		5.5	<b>IMG region</b>	Geographic region depicting the location of graduation of an international medical graduate.				
6.0	<b>Disciplines and positions (quota)</b>	6.1	<b>Discipline group</b>	A rollup grouping of medical and surgical disciplines.		<b>Family Medicine Internal Medicine Surgical Disciplines Non-surgical Disciplines</b>		

**CaRMS - Data Definitions**

Group ID	Group	Element ID	Element	Element Definition	Reporting Element ID	Reporting / Related Measure	Reporting / Related Description	Calculation / Uses
		6.2	<b>Discipline</b>	Area of training as defined by the certifying colleges - Royal College, CFPC and CMQ.				
		6.3	<b>Residency program</b>	University-based program based on discipline that is offered to applicants .				
		6.4	<b>Program site / location</b>	Geographic locations (may include city or community) of a specific program.	6.4.1	<b>No. of program sites</b>	Measure counting the number of unique program sites based on the unique program name provided in the program description. Uses quota stream ID as system identifier.	Count (sum)
		6.5	<b>Program stream</b>	Allocation of positions based on eligibility. Can be limited to CMG, IMG, MMTP/MOTP (Military), or Competitive (both CMG and IMG applicants are eligible).				
		6.6	<b>Quota</b>	The number of allocated residency positions. The lowest level at which this information can be detailed is the program quota stream, which includes school, program site and program stream (CMG, IMG, Competitive, MMTP/MOTP).				Count (sum) Ratio (Supply vs. demand) Ratio (quota to CMGs) Participation rate Proposed Quota (quota posted in program descriptions before match) Revised / Final Quota (quota used during the match after reversions) Filled / Unfilled Fill rate

Group ID	Group	Element ID	Element	Element Definition	Reporting Element ID	Reporting / Related Measure	Reporting / Related Description	Calculation / Uses
7.0	Match Results	7.1	Matched	Descriptor identifying if a final participant matched (y/n) within the current match cycle.	7.1.1	No. of matched applicants	Final match participants matched to a program in the residency match process.	Count (sum)
					7.1.2	% of applicants matched	Percentage calculated by dividing the number of matched applicants by the number of applicants that submitted at least one application and have ranked at least one program.	
		7.2	Unmatched	Descriptor identifying if an applicant went unmatched (y/n) within the current match cycle.	7.2.1	No. of unmatched applicants	Final match applicants that did not match to a program in the match process. Applicant submitted at least one application and ranked at least one program.	Count (sum)
					7.2.2	% of applicants unmatched	Percentage calculated by dividing the number of unmatched applicants by the number of applicants that submitted at least one application and ranked at least one program.	
		7.3	Matched with prior PG training	Descriptor identifying an individual applicant that matched to a program, but had matched in a previous match cycle and identified as having previous postgraduate training.	7.3.1	No. of matched applicants with prior PG training	Applicants that matched to a program and had previously matched to a program in a prior year's match process.	Count (sum)
